Australia's macadamia industry in numbers

Current and forecast crop

43,800t

2025 crop

(in-shell at 3.5% moisture)

85,440t

2030 forecast crop¹

(in-shell at 3.5% moisture)

Area under production¹

46,487ha

Area planted

(as at Nov 2025)

37,987ha

Area bearing

(for the 2025 crop)

Industry footprint

Number of growers

(in the 2025 season)

Carbon sequestered (CO₂e)

668,571t

Export value (last financial year)

\$275m

Production exported
