

# Contractor drive units

*Be in control of your harvest!*

## Track Drive Reduction Hubs

- Increases low speed torque
- Lowers hydraulic working pressure
- Automatic engaged safety brakes

## Direct Coupled Transmission

- Eliminates all drive belts, idlers and pulleys
- Reduces pump shaft side load
- Increased drive efficiency

## Hydraulic Steering Control

- Improves driver comfort and control
- Eliminates control linkages and dampers

## Transmission Cooler

- Increases the life of all transmission components
- Reduces high temperature torque losses
